LINUX COMMAND CHEAT SHEET

Day 02: Talking to the Shell Like a Pro 🖥️

Golu

"Yaar Ladoo, itne saare commands hain, kaise yaad rakhun? Kuch **Shortcuts** batao na!"

"Bhai Golu, commands ratna nahi, use karna seekho!"

Aaj hum essential **DevOps Commands** ka dashboard banayenge."

Ladoo

Bhai, Aaj Kya Seekhenge?

*Aaj hum Linux CLI ke **Top Commands** ko categorize karenge. Navigation se lekar File operations aur System info tak, sab yahan milega!*

LEARNING OBJECTIVES

- **Navigate:** Moving between directories like a pro.
- **Manipulate:** Creating, copying, and deleting files/folders.
- **Inspect:** Checking system health and current identity.

💡 **Kyu Seekhein?** Kyunki DevOps mein Automation tabhi shuru hoti hai jab aap CLI mein fast hote ho!

ANALOGY: THE TV REMOTE

Golu

"CLI bilkul **TV Remote** jaisa hai! Aap button dabate ho (command type karte ho) aur TV channel badalta hai (action hota hai)."

1. **Button:** Command (e.g., 'ls').
2. **Signal:** Shell interprets it.
3. **Action:** Kernel executes (e.g., shows files).

? DID YOU KNOW?

Tab

Up

Command History

Ctrl+C

Emergency Exit

THE BIG THREE: NAVIGATION, FILES, SYSTEM

1. Moving Around (Navigation)

Command	What It Does	DevOps Tip
<code>pwd</code>	Print Working Directory	Kahan ho bhai? Yeh batayega.
<code>ls -la</code>	List all files (hidden too)	-l=Long, -a=All. Must use!
<code>cd ..</code>	Go back one folder	Parent directory mein jump.
<code>cd ~</code>	Go to Home	Ghar wapsi!

2. Managing Stuff (File Ops)

Command	What It Does	DevOps Tip
<code>mkdir -p</code>	Make nested folders	Parents bhi bana dega automatically.
<code>touch</code>	Create empty file	Quick testing file creation.
<code>cp -r</code>	Copy (Recursive)	Folders ke liye -r zaroori hai.
<code>rm -rf</code>	Force Delete (DANGER)	Bhai, sambhal ke! Sab uda dega.

3. System Check (Identity & Health)

Command	What It Does	DevOps Tip
<code>whoami</code>	Current user name	Aap kaun ho?
<code>hostname</code>	Machine name	Server ka naam kya hai?
<code>uname -a</code>	System Info	Kernel version aur architecture.

Command

What It Does

DevOps Tip

`df -h`

Disk Usage

Space full toh nahi ho gayi?

KEY CONCEPTS: PATHS

Absolute Path

Starts from root (/). Pure raste ka map.

`/etc/nginx/nginx.conf`

OR

Relative Path

Starts from where you are. Shortcut!

`./config.txt`

COMPARE: LS VS LS -LA

ls

"Sirf upar upar se dikhayega
(Normal files)."

VS

ls -la

"Andar ki baat! Permissions,
Size, Hidden files (.env) sab
dikhega."

REAL-WORLD EXAMPLE: THE LOG HUNT

"Bhai, server hang ho raha hai! Check karo logs
kahan hain?"

Fix: `cd /var/log && ls -lh`

DevOps Engineers daily use: `tail -f /var/log/syslog` (Live log monitoring).

⚠ COMMON MISCONCEPTIONS

- **Myth:** Commands yaad karna mushkil hai.
- **Reality:** Sirf 10-15 commands 90% kaam kar dete hain. history check karo!
- **Myth:** `rm -rf` file recovery possible hai.
- **Reality:** Linux CLI mein "Recycle Bin" nahi hota. Ek baar gaya toh gaya!

▶ TRY IT YOURSELF: PRACTICE DRILL

1. `mkdir -p devops/day02` (Foldero ka khandaan!)
2. `cd devops/day02 && touch notes.txt`
3. `ls -la` (Check hidden folders like `.` and `..`)

✓ QUICK SUMMARY

- **Navigation:** pwd, cd, ls.
 - **Creation:** mkdir, touch.
 - **Identity:** whoami, hostname.
 - **Cleanup:** rm -rf (Dangerous but useful).
-

? MINI QUIZ — TEST YOUR UNDERSTANDING

1. Folder ke andar jane ke liye kaunsa command hai?

- | | |
|----------|-------|
| a) touch | b) cd |
| c) ls | d) mv |

2. Hidden files dekhne ke liye "ls" ke saath kaunsa flag use karenge?

- | | |
|-------|-------|
| a) -l | b) -h |
| c) -a | d) -x |

3. Home directory ka shortcut symbol kya hai?

- | | |
|-------|------|
| a) / | b) . |
| c) .. | d) ~ |

4. Ek naya folder banane ka command?

- | | |
|-----------|-----------|
| a) mkfile | b) mkdir |
| c) newdir | d) create |

5. "whoami" command kya batata hai?

- | | |
|---------------|-----------------|
| a) Machine IP | b) Current User |
| c) RAM Status | d) OS Version |

6. Nested folders (folder ke andar folder) banane ke liye flag?

- | | |
|-------|-------|
| a) -r | b) -f |
| c) -p | d) -a |

7. Force delete command "rm -rf" mein -r ka matlab?

- | | |
|---------|--------------|
| a) Real | b) Recursive |
|---------|--------------|

c) Remove

d) Reset

✓ ANSWER KEY

"Golu, check kar lo: 1-b | 2-c | 3-d | 4-b | 5-b | 6-c | 7-b"
